

“ Testimonials

We were one of the first users of this amazing product on our Springer Spaniel's post surgery wound after being spayed. The barrier cream had a miraculous impact on the speed of healing of what was a sizeable enough wound.

This was of great assistance in allowing Suzi get back quickly to being out and about without risk of the wound re-opening such was the benefit of the barrier that Zarasyll provided.

I would highly recommend this product for use as a barrier for cuts and nicks as well as larger wounds.

Zarasyll Companion

Revolutionary Technology for
Animal Skincare.

Recommended by Veterinarians

ZARASYL IS FORMULATED WITH TECHNOLOGY THAT WORKS!

Our results are powered by an exclusive patented technology composed of a proprietary amorphous silica and inspired by over 10 years of research and innovation.

NOVEL SILICATE SCIENCE

- Silica is the third most common trace element in mammals and is essential for healthy connective tissue growth and immune function.
- Amorphous silica is non-toxic via oral, dermal and ocular routes of exposure.
- In water it dissolves to form orthosilicic acid (Si(OH)₄), the bioavailable form of silicon that's associated with healthy connective tissue growth.

MOISTURIZATION & BARRIER

- Proprietary formulation that maintains a moist environment. Wounds heal 30-50% faster with a moist environment.
- Provides a barrier to protect wounds and surrounding tissue.

NO NEGATIVE EFFECT ON HEALING

- Semi-occlusive allowing oxygen in which is vital for healing - Intricately involved in numerous biological processes including cell proliferation, angiogenesis, and protein synthesis, which are required for restoration of tissue function and integrity.
- Irritant free, Fragrance free, Paraben free, Oil free

ANTIBIOTIC & STEROID FREE

- Easy to apply in less than ideal conditions
- Competition safe for show animals
- Non-toxic

USAGE

For all Companion animals - it can be used as a barrier in the management of

- ✓ Wounds
- ✓ Surgical Incisions
- ✓ Irritated Itchy Skin
- ✓ Lick Granuloma
- ✓ Atopic Dermatitis
